PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building and owning Laravel REST APIs, CRM systems, and workflow automation for logistics and ERP platforms, now extending into full-stack development with Next.js and React. Experienced across the full development cycle: API and database design, testing, CI/CD deployment, and integration with internal and third-party services. Hands-on with AI and LLM tools to automate workflows and ship faster.

WORK EXPERIENCE

Software Engineer L2, Stockarea

October 2024 – Present | India

- Build and own Laravel REST APIs powering core logistics workflows across internal modules and services.
- Diagnosed and fixed a major performance bottleneck in report-generation APIs, cutting memory usage from ~3 GB to ~200 MB and response time from ~5 minutes to ~5 seconds by restructuring how large datasets were queried and processed.
- Single-handedly designed and developed the company's CRM modules and workflows end to end, integrating AI-powered automation into the flows.
- Designed and built the backend for the company's positions and asset-management system end to end as the sole engineer, owning data structuring, architecture, and implementation.
- Built and maintain workflow-automation tools relied on daily by 1,000+ people, streamlining operations for every team.
- Architect and maintain the ERP backend for billing, invoicing, and purchase orders, improving accuracy and consistency of financial records.
- Developing internal web applications with Next.js and React, extending ownership from backend APIs to full-stack delivery.
- Designed n8n workflows connecting WhatsApp messaging, website-to-email alerts, and scheduled jobs, eliminating manual follow-ups and repetitive data entry.
- Own end-to-end delivery: design, testing, debugging, and deployment via GitHub CI/CD, Docker, and Coolify.

Solutions Architect, Stockarea

August 2023 – October 2024 | India

- Designed and built the foundation of Stockarea's internal automation, translating business operations into reliable backend workflows.
- Developed backend integrations with Laravel and Google APIs to connect disparate internal tools.
- Established reporting and data-management solutions with Metabase, MongoDB, and SQL to support operational decision-making.
- Built early workflow tools using Google Apps Script and AppSheet that became part of daily operations.

Founder & Software Analyst, Flare Innovations

February 2022 – June 2023 | India

- Founded and led development of IoT-based monitoring systems for aquaculture and hydroponics environments.
- Built Python applications to process and analyze real-time sensor data from hardware devices.
- Integrated hardware sensors with cloud systems to enable remote, real-time monitoring.
- Coordinated small development teams through product prototyping and testing.

TECHNICAL SKILLS

Backend: Laravel, PHP, REST API Development, CRM and ERP Modules, API Integration, Feature Testing

Frontend: Next.js, React, JavaScript, HTML, CSS

Databases: MySQL, MongoDB, SQL

Asynchronous Processing: Laravel Jobs, Event-Based Processing, Task Scheduling

Automation and Workflow: n8n, Google Apps Script, Zapier, AppSheet

DevOps and Deployment: AWS, GitHub CI/CD, Coolify, Docker

Tools and Platforms: Git, GitHub, Postman, Linux, Metabase

AI and Automation: AI-Assisted Development, AI Workflow Automation, LLM Tools, Prompt Engineering

Programming Languages: PHP, JavaScript, Python

EDUCATION

B.E. in Electronics and Communication Engineering

Sri Sairam Engineering College, Chennai | 2019 – 2023 | CGPA: 9.05/10

Higher Secondary, Computer Science

Leo Matriculation Higher Secondary School, Chennai | 2019

PUBLICATIONS

- Intelligently Optimized System for Hydroponic Cultivation, IEEE Xplore, 2022. ieeexplore.ieee.org/document/9767724
- Aiderbot: DTMF Based Medical Robot, IEEE Xplore, 2022. ieeexplore.ieee.org/document/10047694

PATENTS

- An Intelligent Transport Vehicle Management and Routing System. Intellectual Property India, Application No. 202241077102. Filed December 2022, Published January 2023.

AWARDS

- Mentor, Smart India Hackathon (SIH) Finalist Team, 2024
- Best Outgoing Student, Institution of Engineers India (IEI), 2023
- School Topper, SSLC (98%), 2017
